

The Presidents Henchman

According to the polls, its only a matter of time - and not that long a time - before the United States elects its first female president. Which will make her husband - what? Well, if hes the ex-cop who solved the murder of the presidents first husband and brought the killers to justice ... and if hes not the kind of guy to stand on formality ... and if he doesnt want to be the head of the FBI ... and if he takes out a license and becomes the first private eye to live in the White House ... That would make him The Presidents Henchman. Jim McGills first case is to find out who is stalking a member of the White House press corps, before that stalker turn a he-said she-said charge of adultery leveled against a female colonel working at the Pentagon, a case with the potential to derail the new presidents administration before it has a chance to begin.
