

## Screw The Beautiful Forever: Life, Death, and Hope in a Pleasant, Middle-Class Gated Community in Delhi (Cities Book 1)

Is the Indian century ahead of us? Nick Booker-Soni thinks so. I met Nick at a dinner party in Paris. The other guests were tech experts, scientists, and investors, and all were gloomy about the West. Progress wasn't progressing, they complained. The economy was permanently stalled. There were too many impediments to innovation. The Scientific and Industrial Revolutions had reached the end of the line. The West was doomed. But Nick, on the other hand, who lives in Delhi, was by far the most optimistic Westerner I met since 2008. It's too bad the others weren't listening to our small talk that evening, because if Nick's right, India has the answer to their questions and the solution to all our problems. He and I spoke for a while at that open window overlooking the Seine. Obviously, he said, India's the key. But don't take my word for it. Come see for yourself. I did. This short book describes what I found.
