

# Heat, Light, Microwaves, Magic: The Obelisk (Harder Than Diamonds) (Volume 1)

What if? Sometimes this simple question leads to a hopeful end and sometimes it plunges you deep into a waking nightmare. The first book in the series *Harder Than Diamonds*, *Heat, Light, Microwaves, Magic* explores everything from odd lights in the sky, to a transformed Earth in the future, to a strange fantasy realm where things do not appear as they are, to a techno-thriller that questions the nature of reality and the role of fate in the shaping of events. An intriguing look into ourselves and the world around us, the collection of six short stories mysteriously connected together, spanning space, time and other planes will open your imagination to unexplored realms, to frightening realities.
