

Shoebox: A Psychological horror thriller

From the #1 bestselling author, Michael Bray comes a psychological horror thriller Lee Schofield is about to be taught a valuable lesson. He is about to learn that sometimes, the things that look like the answers only pose more questions, and that things which seem to have been presented by fate as a means to help, bring their own deadly problems. When those around you want what you have, some men will go to any lengths to stop them. A dark, psychological horror thriller from the bestselling author of *Whisper*, *The Island*, and *Funhouse*, *Shoebox* is a story which follows Schofield on a spiralling journey into paranoia, madness, and insanity. Nobody can be trusted, nobody is safe. The shoebox belongs to Schofield, and he will do whatever it takes to protect it.

Praise for *Shoebox*: This is a sinister tale of mental illness and paranoia, and as always is so well written, it's almost impossible to put down. The author really knows how to captivate his readers. Whoa! Even reading the book description I was blown away! Constantly entertained, and a bit confused but in a good way! There was definitely no guessing any of what happened here, which is always good! Love, madness, greediness and violence! Highly recommending to all fans of modern horror! Crazy. An insanely good little tale with enough of a twist to keep me entertained.
